SMARTMONEY

Privacy Policy

Last updated: 18 October 2026
Effective date: 18 October 2026

SmartMoney ("**SmartMoney**", "**we**", "**us**", or "**our**") is an affiliate cashback platform. Through the SmartMoney mobile application and related services (together, the "**App**" or "**Service**"), users browse participating stores and offers, click through affiliate links to merchant websites, complete purchases on those merchant websites, and earn cashback once the merchant confirms and validates the transaction.

This Policy is operated by SmartMoney (registered trade name: SMART MONEY), a sole proprietorship owned by Rupankar De, the owner and operator of the App. SmartMoney is registered under Gram Panchayat Trade Registration No. 528, issued on 1 September 2026 (valid for 2026–2029), and is not currently incorporated as a separate company or LLP. This Policy explains what information we collect, how we use and share it, how we protect it, and the choices and rights you have. By creating an account or using the App, you agree to the practices described in this Policy, as well as to our Terms of Service, which governs your use of the App more broadly. If you do not agree, please do not use the App.

---

1. Introduction

SmartMoney is an affiliate cashback platform. Users browse stores and offers, open affiliate links through SmartMoney, complete purchases on merchant websites, and earn cashback after the merchant validates the transaction. SmartMoney is the business operating the App; if SmartMoney later operates under a separate incorporated legal entity, that entity's registered name, address, and registration number will be added here.

2. Information We Collect

We collect the following categories of information:

- **Name** — the full name you provide when creating your account.
- **Email address** — used for account identification, login, verification (OTP), and communication.

- **Mobile number** — collected as contact information only. SmartMoney does not currently verify mobile numbers or use them for OTP purposes; account verification is performed via your email address only.
- **Account/login information** — your password (stored in encrypted/hashed form, never in plain text) and account status.
- **Profile information** — an optional profile photo you upload, stored via our cloud storage provider.
- **Technical information** — details that your device and the App send automatically with each request, such as the type of software making the request, used to keep the App working correctly and securely.
- **IP address** — collected automatically by our servers as part of standard request logging, for security and fraud-prevention purposes.
- **Consent record** — when you create an account, we record that you confirmed you are 18 or over and accepted the Terms of Service and this Privacy Policy, together with the version of the documents, the date and time, and your IP address, as evidence of your consent.
- **App usage data** — basic operational and diagnostic information generated by your use of the App, used to operate, secure, and improve the Service. SmartMoney does not currently use a dedicated third-party analytics or crash-reporting SDK; if that changes, this Policy will be updated.
- Any other information you choose to provide, such as content of support requests you send us.

We do not currently collect date of birth, government ID numbers, or biometric data as part of account registration.

3. Cashback & Transaction Data

To operate the cashback service, we collect and generate:

- **Affiliate click data** — a record created each time you click an affiliate link within the App, including a tracking reference, redirect token, the destination merchant URL, and the tracked/attributed URL.
- **Merchant/order information** — details of the merchant and, where made available to us, order-level information needed to validate a purchase (e.g., order ID, order value, order date).
- **Cashback earned** — the cashback amount calculated for a qualifying transaction.
- **Cashback status** — Pending, Awaiting Admin Review, Confirmed, Rejected, Paid Out, or Reversed.
- **Transaction/reference IDs** — internal and affiliate-network reference identifiers used to track a purchase from click to cashback confirmation.

4. Wallet & Payout Information

Your SmartMoney wallet tracks your available balance, pending balance, total cashback earned, and total amount withdrawn.

When SmartMoney's withdrawal feature is available, processing a withdrawal will require us to collect payout details necessary to send funds to you, which may include:

- **UPI ID**
- **Bank account details** (account number, IFSC code, account holder name), if you choose bank transfer instead of UPI
- **Withdrawal/payout history** — a record of your withdrawal requests and their status

We only collect the payout details relevant to the payout method you select, and only at the time you request a withdrawal. Withdrawals are currently paid **manually** by SmartMoney from its own bank account. Authorised SmartMoney staff can see your payout details while your withdrawal is open, so that they can pay you, and the details are stored in encrypted form. When your withdrawal is settled, we remove the full payout details from our systems and keep only a masked version (for example, the first characters of your UPI ID) and the bank's transaction reference as part of your withdrawal record. We do not currently use a third-party payout provider.

5. Affiliate Tracking

SmartMoney earns commission from merchants when you complete a purchase after clicking through an affiliate link in the App, and we share part of that commission with you as cashback. To make this possible, we use:

- **Affiliate links** generated for each store/offer you click on.
- **Affiliate network tracking** — provided by our affiliate network partner(s) (currently including Cuelinks), used to route your click to the merchant and to attribute the resulting purchase back to your click.
- **Click/transaction attribution identifiers** — a tracking reference and redirect token, unique to each click, used to match a merchant-confirmed purchase to your account.
- **SubIDs or similar tracking identifiers** passed to our affiliate network partner(s) and, in turn, to the merchant, so a purchase can be correctly attributed to you for cashback purposes.

6. How We Use Your Information

- Create and manage your SmartMoney account

- Authenticate you and keep your account secure
- Track your affiliate clicks and purchases
- Calculate cashback owed to you
- Credit confirmed cashback to your wallet
- Process withdrawal/payout requests
- Provide customer support and respond to your queries
- Detect, investigate, and prevent fraud, abuse, and violations of our terms
- Analyze usage and improve the App's features and reliability
- Comply with legal, tax, and regulatory obligations

We send you transactional messages about your account, cashback, and withdrawals by email or in-app message. SmartMoney does not currently send promotional or marketing communications, and does not use SMS, WhatsApp, or push notifications. If we begin to, we will update this Policy and obtain your consent beforehand, and you will be able to opt out of promotional communications at any time.

7. Third-Party Services

- **Affiliate network partner(s)** — currently including Cuelinks, used to generate affiliate links, route clicks to merchants, and attribute purchases for cashback calculation. SmartMoney's platform is built to support additional partners over time; this Policy will be updated to name any newly added partner.
- **Microsoft Azure** — our cloud hosting, database, and storage provider (Hyderabad, India region), used to run the App's backend, store account and transaction data, and store uploaded content such as profile photos and catalogue media.
- **Brevo** — our email delivery provider, used to send the verification codes (OTP) and other transactional emails (such as password resets and account notices) to your email address. Brevo receives your email address and the content of those emails only to deliver them.
- **Our bank and the UPI and bank-transfer payment networks** — because withdrawals are currently paid manually from SmartMoney's own bank account, the bank and the payment networks receive your payee details (name and UPI ID, or account number and IFSC code) only to deliver your payout. SmartMoney does not currently use a third-party payout provider; if that changes, we will name it in this Policy before it goes live.

SmartMoney does not integrate Firebase, third-party analytics, crash-reporting SDKs, or third-party SMS/OTP providers (verification codes are currently sent by email). If we integrate any such service in

the future, we will update this Policy before doing so.

8. Sharing of Information

- **With our affiliate network partner(s) (currently Cuelinks) and, through them, with merchants** — click and attribution identifiers needed to validate your purchase and calculate cashback.
- **With our service providers** (e.g., Microsoft Azure for hosting, database, and file storage) — only the information needed for them to perform that specific function on our behalf.
- **With our email delivery provider (Brevo)** — your email address and the content of the transactional emails we send you, only so that they can be delivered.
- **With our bank and the payment networks** — the payee details needed to deliver your withdrawal to you, and for no other purpose.
- **With law enforcement or regulators** — where required by applicable law or legal process.
- **In connection with a business transaction** — such as a merger, acquisition, or asset sale, subject to standard confidentiality protections.

SmartMoney does not sell your personal data to third parties, and we do not share your personal data with third parties for their own independent marketing purposes.

9. Merchant Redirects

When you click an affiliate link or offer in the App, you will be redirected to a third-party merchant's website to complete your purchase. Once you leave the SmartMoney App, your interaction with the merchant's website is governed by that merchant's own privacy policy and terms, not this Policy. SmartMoney does not control, and is not responsible for, the privacy practices, content, or security of merchant websites.

10. Cookies & Tracking Technologies

- **Affiliate tracking identifiers** — tracking references, redirect tokens, and tracked URLs, used to attribute purchases made after you click through the App.
- **Session tokens** — used to keep you signed in and to protect your account.
- **Cookies** — if you access any SmartMoney web-based property, that property may use cookies for session management and security. The SmartMoney mobile app itself does not use browser cookies.
- **Analytics technologies** — we do not currently use a dedicated third-party analytics SDK.

11. Data Storage & Security

- Passwords are stored in hashed (encrypted) form — never in plain text.
- Token-based authentication (short-lived access tokens and refresh tokens) secures your session.
- Data in transit is encrypted using industry-standard protocols (HTTPS/TLS).
- Account and transaction data is stored in an access-controlled database hosted on Microsoft Azure (Hyderabad, India region); uploaded files are stored via Azure's cloud storage.
- Access to personal data is restricted to personnel who need it to perform their role.

No method of transmission or storage is 100% secure, and we cannot guarantee absolute security. If we become aware of a data breach affecting your personal data, we will notify you and relevant authorities as required by applicable law.

12. Data Retention

We retain your account, transaction, and cashback data for as long as your account is active and as needed to provide the Service. After you close your account or request deletion, we retain certain data for up to **8 years** from the date of closure, where necessary to resolve pending cashback or disputes, comply with tax and accounting record-keeping requirements, and prevent fraud. Once these purposes no longer apply, or the 8-year period has elapsed, whichever is sooner, we delete or anonymize the remaining data.

13. Account & Data Deletion

You can delete your SmartMoney account in the App by opening your profile, choosing Delete account, and confirming your password. You can also raise a deletion request by emailing admin@smart-money.in from the email address registered on your account. We will reply to confirm the request before we act on it.

When you request deletion:

- **Money in your wallet:** you cannot delete your account **in the App** while there is money in your wallet, meaning confirmed (available) cashback or an amount held for a withdrawal that is still in progress. Withdraw it first, as described in our Terms of Service, and then delete your account. If you instead **ask us by email** to delete your account while there is money in your wallet, we will delete it, but **the money in your wallet is forfeited and is not refundable**. Before we do, we will tell you the amount and ask you to confirm. A withdrawal that is already in progress is completed or cancelled first.

- Any pending (unconfirmed) cashback tied to an in-progress merchant transaction may be resolved or forfeited, since it cannot be verified after account closure.
- When your account is deleted, we delete your profile photo, replace your name, email address and mobile number with anonymised values, and sign you out of every device. We keep a restricted copy of your original name, email address and mobile number for 90 days, visible only to senior administrators, for fraud checks and open disputes, and then delete it. Wallet and transaction records are kept for the period in Section 12, linked only to the anonymised account.
- We will delete or anonymize your other personal data, except for information we are legally required to retain (e.g., transaction and payout records for tax/accounting purposes, or fraud-investigation records).

14. User Rights

Subject to applicable law (including India's Digital Personal Data Protection Act, 2023), you have the right to:

- **Access** the personal data we hold about you
- **Correct** inaccurate or incomplete personal data
- **Delete** your personal data, subject to the limitations in Sections 12–13
- **Withdraw consent** you previously gave, where our processing relies on consent
- **Nominate** another individual to exercise these rights on your behalf in the event of your death or incapacity, in the manner prescribed under the Digital Personal Data Protection Act, 2023
- **Raise a grievance** with our Grievance Officer if you believe your data has been misused
- **Escalate to the Data Protection Board of India** if you are not satisfied with how your grievance is resolved by our Grievance Officer
- Receive a response within a reasonable timeframe, as required by applicable law

To exercise these rights, contact us using the details in Section 17. We may need to verify your identity before acting on your request.

15. Children's Privacy

SmartMoney is intended for users who are 18 years of age or older, consistent with our handling of financial and cashback wallet data. We do not knowingly collect personal data from children. If we become aware that we have collected personal data from someone under 18, we will delete it promptly.

16. Changes to This Privacy Policy

We may update this Policy from time to time to reflect changes in our practices, features, or legal requirements. When we make material changes, we will update the “Last updated” date above and, where appropriate, notify you through the App or by email. Your continued use of the App after a change takes effect constitutes acceptance of the updated Policy.

17. Contact / Grievance

Business/legal entity name: SmartMoney (registered trade name: SMART MONEY), a sole proprietorship owned by Rupankar De, registered under Gram Panchayat Trade Registration No. 528 (registered 1 September 2026)

Privacy contact email: admin@smart-money.in

Grievance Officer
In accordance with the Information Technology Act, 2000 and rules made thereunder, and the Digital Personal Data Protection Act, 2023, the following Grievance Officer can be contacted with any complaints regarding the processing of your personal data:

- Name: Rupankar De
- Designation: Founder
- Email: admin@smart-money.in
- Address: Kolkata, West Bengal

This Policy is governed by the laws of India. Any disputes arising under this Policy shall be subject to the exclusive jurisdiction of the courts of **Kolkata, West Bengal**.
